SUMMARY

Computer Science undergraduate specializing in Cybersecurity with hands-on experience in full-stack web development and network security analysis. Proficient in Python, JavaScript, SQL, and Node.js with strong knowledge of Data Structures and Algorithms (DSA). Experienced in packet analysis using Wireshark and network reconnaissance using Nmap. Actively solving LeetCode problems and building secure, scalable software solutions. Seeking Software Developer or Cybersecurity roles.

EDUCATION

- Pranveer Singh Institute of Technology** Kanpur, India
Bachelor of Technology in Computer Science and Engineering (Cybersecurity) 2022 – 2026
 - Percentage: 68.7%
- Shree Sanatan Dharm Education Center (CBSE)** Kanpur, India
Intermediate 2022
 - Percentage: 76%
- Shree Sanatan Dharm Education Center (CBSE)** Kanpur, India
High School 2020
 - Percentage: 88.8%

EXPERIENCE

- TechnoHacks Solutions** March 2025 – April 2025
Cybersecurity Intern
 - Analyzed packet-level network traffic using Wireshark to capture, filter, and reconstruct sessions for improved threat visibility.
 - Conducted network reconnaissance using Nmap, including host discovery, port scanning, service detection, and NSE scripting.
 - Performed basic vulnerability assessments and documented security findings for remediation.
 - Strengthened understanding of network behavior and security posture across multiple simulated scenarios.

PROJECTS

- ResQ – Secure Emergency Reporting App** Oct 2025 – Present
React Native, Node.js, Express.js, MongoDB, JWT, Supabase
 - Architected JWT-secured REST APIs enabling anonymous incident reporting and SOS alerts while protecting sensitive user data.
 - Engineered backend workflows for discrete mode and panic-delete functionality for high-risk emergency scenarios.
 - Established secure authentication and encrypted user handling to enhance user privacy and system reliability.
- Trash-Trade Marketplace**
HTML, CSS, JavaScript, Gemini API, SQL, Node.js
 - Built a full-stack marketplace enabling users to sell household waste and purchase recycled products.
 - Integrated secure user interactions, product listings, and transaction workflows to promote sustainable recycling.
 - Optimized database queries and backend logic for smoother user experience and faster response time.
- Vehicle Tracking System**
HTML, CSS, JavaScript, Python, Node.js, MySQL, Google Maps API, WebSockets
 - Constructed a real-time vehicle tracking web application with live location monitoring and sub-second update capability.
 - Integrated GPS data with Google Maps API for accurate geolocation visualization and route tracking.
 - Engineered RESTful APIs for efficient frontend-backend communication.
 - Deployed secure user authentication and WebSocket-based real-time updates to improve system responsiveness.
 - Streamlined data flow to reduce latency in live tracking updates.

TECHNICAL SKILLS

- Programming Languages:** Python, Java, JavaScript, C (Basic)
- Web Development:** HTML, CSS, JavaScript, Node.js, Express.js, REST API Development, WebSockets
- Database Management:** SQL, MySQL, MongoDB, DBMS Concepts
- Cybersecurity:** Network Security, Vulnerability Assessment, Packet Analysis, Wireshark, Nmap, Cryptography Basics
- Core Computer Science:** Data Structures and Algorithms (DSA), Object-Oriented Programming, Operating Systems
- Tools & Platforms:** Git, GitHub, Postman, VS Code

CERTIFICATIONS

- Cloud Practitioner Essentials (AWS) | Oracle AI Foundations Associate (Oracle)** Mar 2025
- SQL, Python, Java (HackerRank)** Sep 2025
- Microsoft Azure SQL Database Fundamentals (Microsoft)** Sep 2025
- HTML5, CSS3, JavaScript, React.js (Infosys Springboard)** Mar 2025
